

# RESTORING HOPE

We help individuals build a better life, one day at a time.

Emotional health and well being are important to functioning on the job or in school, to physical health and the ability to enjoy life.

Problems such as depression, anxiety disorders, bipolar disorder, schizophrenia, alcohol and drug dependency or eating disorders can make it hard for people to cope and maintain stability in their lives.

**Windsor-Laurelwood Center for Behavioral Medicine**, a regional provider of behavioral health

and addiction recovery services, offers compassionate, accessible, behavioral health services for adults, adolescents and children.

With outpatient services in two locations and inpatient services at our Willoughby location, we offer hope and a brighter future for individuals of all ages struggling with mental health issues or alcohol and drug dependency.

Don't suffer in silence. Call 1-800-GET-HOPE (1-800-438-4673).
